

## Technical Updates You'll Need to Make Decisions

1. **TPO Roofing Membrane performance problems have been widely rumored for about a year and a half. Several salient 3<sup>rd</sup> party articles appear on our website at [www.division7.com](http://www.division7.com).**

2. **NEW and Problem Solving Product!** The redesigned York Manufacturing Termination Bar profile addresses most of the common shortcomings of historically used flat termination bars. Go to [www.yorkmfg.com](http://www.yorkmfg.com) to view this advancement in thru wall flashing termination bars. It truly is a problem solver and at the same cost as other term bars. There have been no field problems reported with this new profile and it can be used with all known thru wall flashing systems. **For a FREE sample, golf tees and technical data sheet contact Pete Belanger at York Mfg. at 1-800-551-2828 ext #0.**

3. **Graffiti Problems** are ended by incorporating an organofluorosilane in to your Project Specifications. This warranted, non-film forming, fully penetrating antigraffiti chemical has prevented graffiti problems at many a Texas facility. You are welcomed to go to [www.protectosil.com](http://www.protectosil.com) to view one supplier's version. You can also go to [www.division7.com](http://www.division7.com) and download a 3-part non-proprietary, 20 year warranted system specification.
4. **STS Coatings Inc.**, has announced that LT-100 has become one of the largest selling IECC Code Required Exterior Sheathing joint sealant in the contiguous States with an equivalent of 17 million ft<sup>2</sup> of walls sealed so far in 2010. In 2009 that wall footage was equal to 13 million ft<sup>2</sup>. The technical data for this 100% solids, very low VOC sealant is available at their web site [www.stscoatings.com](http://www.stscoatings.com).

5. **BURSI (Better Understanding of Roofing Systems Institute)** has appointed D7S to be a presenter of their **AIA LU Programs**. The first program being offered, **Roofing System Selection**, is on our web site at [www.division7.com](http://www.division7.com).
